## The Space Management Experts

### Cantactix MissionControl Software

Is your company a vendor to major retailers demanding rapid automation of store specific planograms? Are you currently using JDA Space Planning software in a flat file environment? Are you strapped for planogramming personnel, budget and the time to produce hundreds or thousands of planograms and respond to last minute changes from your Buyer?

With **Cantactix MissionControl**, your team can be significantly more productive, delivering large quantities of planograms, with greater data accuracy & retailer acceptance. Deliver on retailer expectations without overtaxing your internal category management resources or investing in expensive database category management software. Become a trusted advisor by leading space management in your category.

At Cantactix, Space Management is our passion and our calling. We are solely dedicated to being **The Space Management Experts**. After many years helping clients deliver planograms to major retailers using JDA Space Planning, our experts developed **Cantactix MissionControl**. We understand the challenges your team faces. This extension to JDA Space Planning solves some of your teams' real-world challenges and maximizes the speed and efficiency of your planogramming process.

### Benefits:

Perform mass updates to multiple planograms quickly and efficiently via:

- Automating repetitive tasks
- Scaling changes from one planogram to hundreds or thousands
- Utilizing interactive highlights for improved accuracy
- Analysing the impact of the changes between new vs. old planograms
- Ensuring planograms match retailer requirements

### Retailers:

Want better planogram compliance from your vendors currently using JDA Space Planning? Connect them with the experts at Cantactix to see how MissionControl can help them deliver accurate planograms that meet your company guidelines.
